EXPERIENCE

AI Intern

EMGS Group

 14 february 2023 – 14 august 2023  Paris, France

Project : Developing a Matching tool for a Sourcing platform

Objective : Facilitate the recruitment process and minimize time and costs

Responsibilities :

- Create an algorithm to match and rank candidate profiles with job offers
- Create a smart CV library where clients can search for candidates based on keywords, skills....
- Deployment of the solution

Tools : Python, NLP, FastAPI, Docker, AWS

AI Intern

Moroccan Parliament - house of representatives

 01 july 2022 – 31 august 2022  Rabat, Morocco

Project : Developing an assistant Chatbot based on Deep Learning to answer questions related to the House of Representatives.

Tools : Python, RASA, Flask

PROJECTS

AI-powered learning and question generation platform

Collaborate with a Full stack web dev team to create an AI-powered learning and question generation platform (**Bevinzey.com**), it will allow users to :

- Quickly summarize the content to identify key points
- Generate study questions based on the content
- Automatic generation of manuscripts from relevant research documents

Tools : OpenAI, GPT-3, LangChain, FastAPI, AWS

Handwritten signature verification

- Creation of an object detection system based on **YOLO** algorithm
- The system receives a signed letter and a form with several signatures and it will recognize and highlight the signatures and compare them to see if they match

Tools : Pytorch, FastAPI, Streamlit, Microsoft Azure

Brain tumor segmentation

- Develop a model to automatically detect and segment brain tumors from MRI images
- This model will allow doctors to diagnose and treat brain tumors more accurately and quickly

Tools : Python, Tesnorflow

Face recognition attendance application

- Automatically track employee attendance using face recognition
- The desktop application will identify employees as they enter and leave the office to track work hours

Tools : Python, OpenCV, Face Recognition, PyQt5

EDUCATION

Artificial Intelligence Engineering

Ecole Nationale Supérieure d'Informatique et d'Analyse des Systèmes (ENSIAS)

 2020 – 2023  RABAT

CPGE | MP (Mathematics and Physics)

CPGE Ibn Tahir

 2018 – 2020  ERRACHIDIA

Baccalaureate | Science math

Lycée Princesse LALLA SALMA

 June 2018  RISSANI

SKILLS

• Techniques :

NLP, Computer Vision, Time Series Forecasting, Object detection, Automation and Web scraping

• Programming Languages :

Python, Javascript

• Machine Learning and Deep Learning :

Scikit-learn, Tensorflow, Pytorch, OpenCV, Transformers, NLTK, Gensim, SpaCy

• Data Analysis and Visualization :

PowerBI, Pandas, Matplotlib, Seaborn

• Databases :

MySQL, MongoDB, Firebase

• MLOps and Hosting :

Docker, Google Cloud, Microsoft Azure, Amazon Web Services (AWS)

• API development :

Flask, FastAPI, Django

• Automation and Web scraping :

Selenium, Requests, Beautiful Soup, Scrapy
